

Latex Conventions and Formatting Choices:

- Quotations: use “ and ” instead of ” ” for quotations. i.e. ”force” → “force”
- Equations:
 - Use “&=” for alignment.
 - Use “align” for numbered equations and “align*” for unnumbered equations.
- All quantities with units should be written using the SI package. i.e. 5cm → 5 cm.
- All figures use the capfig environment, and a caption is included.
- (Do we want a standard size for the figures?)
- Labelling:
 - all lowercase
 - include chapter name in label i.e. fig:applyingnewtonslaws:slidingbox

- Use periods at the end of items in an itemized list. Capitalize items in an itemized list.
- All variables should be in $\$$ i.e. “The value of x is” → “The value of x i”
- Inverse trig functions should be written as $\tan^{-1}$ instead of arctan or $\tan^{-1}$, etc.

- For fractions that are in parentheses, use left(and right) i.e.

$$(\frac{a+b}{c}) \rightarrow \left(\frac{a+b}{c}\right)$$
