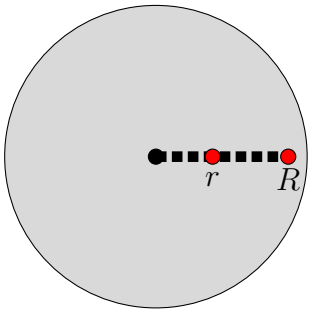
Physics Worksheet

Rotational Dynamics

Name: _____ **Student #:** _____ **Student Email #:** _____

1. Here is a top view of a rotating counter clockwise disk who is rotating at an increasing rate. Indicate which of the below options are **true** and explain why:



(a) R and r have the **same** angular and linear velocity but **different** angular and linear acceleration

(b) R and r have the **same** angular and linear acceleration but **different** angular and linear velocity

(c) R and r have the **same** angular velocity but **different** angular acceleration and linear velocity and acceleration

(d) R and r have the **same** angular velocity and acceleration but **different** linear velocity and acceleration
